EGRESS DOORS

Welded 2×2 steel frame, powder coated to match the enclosure. Glazed upper, solid kick panel, heavy-duty closer. Sizes below are typical and are confirmed at the design consultation.

Standard specification

- Welded 2×2 steel tube frame, fully welded corners.
- Powder coated (Tiger Drylac) to match the enclosure hardware.
- Glazed upper with a solid kick panel below; full-clear and full-solid are options.
- Heavy-duty commercial door closer, self-closing.
- Three heavy-duty hinges; door stops top and bottom.
- Pull handle outside, push to exit inside.
- Opens outward for egress. Swing and hinge side set at the design consultation.
- Transom above the door is plexi or solid powder-coated sheet metal.
